RAT HYBRIDOMA PRODUCING IGG2A MONOCLONAL ANTIBODIES TO MURINE CD226 (DNAM-1)

Colonna, Marco

Poranki, Deepika

T-007610

Inventors generated the antibodies by immunizing rats with RBL cells transfected with mDNAM-1 cDNA (RBL–mDNAM-1) or mouse CD96 cDNA (RBL-mCD96) and selecting hybridomas that reacted with 293–mDNAM-1 or 293-mCD96 transfectants but not with untransfected 293 cells.

Publication: DNAM-1 promotes activation of cytotoxic lymphocytes by nonprofessional antigen-presenting cells and tumors
