

BACTERIAL AND MAMMALIAN EXPRESSION VECTORS FOR PRODUCTION OF SARS-COV PROTEINS

[Dai, Yanan, Fremont, Daved, Harvey, Ian, Nelson, Christopher, Zhao, Haiyan
Hanford, Charles](#)

T-019413

A number of bacterial and mammalian expression vectors for production of SARS-CoV proteins that can be used for immunization, B-cell sorting, and human serum evaluation are available.

Expression constructs produce: spike, ACE2, CD147, Surface display, SARS-1 and SARS-2 ORF7a, ORF8, and nucleocapsid phosphoprotein
