

CHIMERIC MURINE ANTI-FIMH MONOCLONAL ANTIBODIES

[Ellebedy, Ali](#)

[Poranki, Deepika](#)

T-019117

These are recombinant chimeric murine monoclonal antibodies that are directed against FimH, an adhesin within uropathogenic E coli (UPEC). The monoclonal antibodies were isolated from mice immunized with adjuvanted FimCH, but are expressed on a human IgG1 backbone and hence they are chimeric.
