

CLIFEDNAMIDE COMPOUNDS

[Qi, Yunci, Van Dyke-Blodgett, Joshua, Wencewicz, Timothy, Yang, Jinping](#)

[Hardin, Clyde "Frank"](#)

T-019321

Clifednamide A and C are congeners of long known ikarugamycin. Ikarugamycin has anti-inflammatory, anti-ciliate, plant modulatory and other desirable bioactivities. These clifednamide compounds may also have therapeutic, industrial or agricultural value.

Publication: Qi, Y., Ding, E., & Blodgett, J. A. (2018). [Native and engineered clifednamide biosynthesis in multiple *Streptomyces* spp.](#) *ACS synthetic biology*, 7(2), 357-362.
