

IMMUNOHISTOCHEMICAL DIAGNOSIS OF HUMAN RENAL CHROMOPHOBE CARCINOMA

[Crimmins, Dan, Gaut, Joseph, Ladenson, Jack](#)

[Richards, Jennifer](#)

T-011164

This novel immunohistochemical marker would be a valuable diagnostic aid to the practicing surgical pathologist who is confronted with this particular diagnostic challenge. Companies may license this antibody for clinical testing, or cases may be referred to Washington University for subspecialty consultation whereby this novel testing would be used.
