

PDD82, PDD112 AND PDD120 PLASMIDS

[Moon, Tae Seok](#)

[Hanford, Charles](#)

T-018659

Description:

Plasmids-

- pDD82- minimal shuttle vector between *Escherichia coli* and *Rhodococcus opacus* PD630 that contains the pB264 origin of replication.
- pDD112- a shuttle vector between *Escherichia coli* and *Rhodococcus opacus* PD630 that contains the pNG2 origin of replication and a codon optimized chloramphenicol resistance marker.
- pDD120 is a plasmid construct containing the bacteriophage derived recombinases Che9c60 and Che9c61 expressed by a constitutive promoter on the pB264 vector backbone.
