

PLASMID TO TEST REGULATION 5' UNTRANSLATED SEQUENCES IN YEAST

[Granas, David, Roy, Basab, Stormo, Gary, White, Michael](#)

[Richards, Jennifer](#)

T-019560

This plasmid was created to test the regulatory impact of 5' untranslated regions in yeast. It consists of EGFP under the control of the *S. cerevisiae* TEF2 promoter with cloning sites to modify the 5'UTR.
